

# Seal Legal AI Benchmark:

## An Enterprise Project – Not a Science Project

Seal worked with a leading FinTech company to implement an efficient, accurate, and persistent contract load and review solution with additional capabilities and no per-review cost spikes.

### THE IMPACT

- ✓ **Unlimited reviews at no additional cost**
- ✓ **Unparalleled extraction quantity & quality**
- ✓ **Superior accuracy, fewer misses & false positives**
- ✓ **Real-time reporting across more contracts & bespoke criteria**

### THE SHOOTOUT

#### Seal Software

#### Manual Processes

##### Load & index contract images into CLM

**20** Contracts per hour, 1200 contracts

**20** Avg extractions per contract

**99%** Accuracy

##### CLM offshore team & CLM's batch loader

**4** Contracts per hour

**3-5** Avg extractions per contract

CLM's offshore load process **generates lots of errors**, and is **limited to 200 contracts per batch**<sup>1</sup>

##### Nonstandard clause review

**80** Contracts per hour (1210 in 15 hours)

**88** Properly identified clauses

**3** False positives  
**No misses** compared to respected LPD

##### Respected LPD

**4** Contracts per hour

**53** Properly identified clauses

**217** False positives  
**35 misses** compared to Seal

##### Load & analyze vendor contracts for expiration dates

**298** Contracts into CLM with **5066** extractions

**99%** Accuracy

**ANYTIME INSTANT** Reporting

##### Services / Offshore

Expiration dates tracked **manually** in Excel

1 - Senior Contract Analyst, Leading FinTech company

### BENCHMARK REQUIREMENT

**Prove leading FinTech company can use the solution without outside help**

**No** developers or data scientists

**No** Seal staff participation in the actual test

**No** access to contracts until the actual test

**No** model tuning for standard extractions, users developed policies for bespoke extractions in 16 man-hours

### SEAL FOR THE WIN

- 1** Predictable cost as contract volumes increase
- 2** Continuous visibility into nonstandard clauses & material weakness remediation
- 3** Answer ad hoc questions based on bespoke extractions in hours rather than weeks
- 4** Automated, dynamic & more accurate metadata & clause extraction
- 5** Improved contracts onboarding & review capabilities at a lower cost
